 Failed	4
 Linked Defects	4

Test Cases

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
HLTHCR3-39	Verify that patient registration using valid data	Pre-conditions: 1. Connected to the internet 2. open register page Steps: 1. Select the gender (male). 2. Enter the full name (Ahmed Tarek). 3. Enter the email address (ahmed@gmail.com). 4. Enter the phone number (01012345678). 5. Enter the date of birth (23/6/2005). 6. Enter the password (Password@123). 7. Enter a confirm password (Password@123). 8. Click on the "Register."	1. The system registers the new patient account successfully. 2. The user is redirected to the login page or dashboard	 Pass	—
HLTHCR3-40	Verify that the patient cannot select both male and female	Pre-conditions: 1. Connected to the internet 2. open register page Steps: 1. Click on the "Male" gender option 2. Fill all fields with valid data (Full Name, Email Address, Phone Number, Date of Birth, Password, and Confirm Password). 3. Click on the "Female" gender option 4. Click to "Register."	1. The "Male" option is automatically deselected when "Female" is clicked. 2. The system registers the new patient account successfully. 3. The user is redirected to the login page or dashboard	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
HLTHCR3-41	Validation errors when mandatory fields are left blank	Pre-conditions: 1. Connected to the internet. 2. open register page. Steps: 1. Leave all input fields completely blank (Full Name, Email Address, Phone Number, Date of Birth, Gender, Password, and Confirm Password). 2. Click on the "Register" button.	1. The system strictly blocks the form submission. 2. Immediate inline error messages are displayed for all fields indicating that they are required	 Pass	—
HLTHCR3-42	Verify Full Name accepts valid boundaries (3 and 50 chars)	Pre-conditions: 1. Connected to the internet. 2. Open the register page. Steps: 1. Fill all mandatory fields with valid data, expecting Full Name. 2. Enter a name with exactly 3 characters (Ali). 3. Click "Register." 4. Go back to the registration page. 5. Fill all mandatory fields with valid data (new email and phone), expecting the full name. 6. Enter a name with exactly 50 characters (Ahmed Tarek Ahmed Tarek). 7. Click "Register."	1. The system accepts both boundary inputs and successfully registers new patients.	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
HLTHCR3-43	Verify Full Name rejects invalid boundaries (2 and 51 chars)	Pre-conditions: 1. Connected to the internet. 2. Open the register page. Steps: 1. Fill all mandatory fields with valid data, expecting Full Name. 2. Enter a name with exactly 2 characters (Al). 3. Click "Register." 4. Go back to the registration page. 5. Fill all mandatory fields with valid data (new email and phone), expecting the full name. 6. Enter a name with exactly 51 characters (Ahmed Tarek Ahmed Tarek). 7. Click "Register."	1. The system blocks form submission for both attempts. 2. Displays an inline error indicating the name must be between 3 and 50 characters.	 Pass	—
HLTHCR3-44	Verify Full Name rejects numbers and symbols	Pre-conditions: 1. Connected to the internet. 2. Open the register page. Steps: 1. Fill all mandatory fields with valid data <i>EXCEPT</i> the Full Name field. 2. Enter a name containing numbers (Ahmed123). 3. Click on the "Register" button. 4. Clear the field, then enter a name containing special characters (Ahmed@Tarek).	1. The system blocks form submission. 2. An inline error is displayed indicating only alphabetic characters and spaces are allowed.	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
		5. Click on the "Register" button.			
HLTHCR3-45	Verify the email field does not accept an email that is already registered.	Pre-conditions: 1. Connected to the internet 2. open register page Steps: 1. Fill all mandatory fields with valid data, excepting an email address. 2. Enter an email that is already registered (ahmed@gmail.com). 3. Click "Register."	1. The system blocks form submission for attempts. 2. Displays an inline error indicating the email is already registered.	 Pass	—
HLTHCR3-47	Verify Email Address rejects invalid formats	Pre-conditions: 1. Connected to the internet. 2. open the register page Steps: 1. Fill all mandatory fields with valid data, excepting the email address. 2. Enter an email missing the "@" symbol (ahmedgmail.com). 3. Click on the "Register." 4. Observe the validation. 5. Clear the field of email. 6. Enter an email missing the domain (a@ab..c). 7. Click on the "Register."	1. The system blocks form submission for both attempts . 2. Displays an inline error indicating that the email format is invalid (must match standard RFC 5322 format).	 Fail	 HLTHCR3-109
HLTHCR3-48	Verify Phone Number accepts all valid Egyptian prefixes	Pre-conditions: 1. Connected to the internet 2. Open the register page.	1. The system accepts all valid prefixes, verifies the 11-digit length,	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
		Steps: 1. Fill all mandatory fields with valid data. 2. Enter an 11-digit phone number starting with 010 (01012345678). 3. Click "Register." 4. Observe successful registration. 5. Navigate back to the Registration page and repeat the process for prefixes 012, 011, and 015 using new valid emails for each attempt. 6. Click "Register."	and registers the accounts successfully without errors		
HLTHCR3-50	Verify Phone Number rejects invalid lengths and unsupported prefixes	Pre-conditions: 1. Connected to the internet 2. Open the register page. Steps: 1. Fill all mandatory fields with valid data <i>EXCEPT</i> the phone number. 2. Enter a phone number with an invalid prefix (0131234568). 3. Click "Register." 4. Clear the field and enter a 10-digit number (0101234567). 5. Click "Register." 6. Clear the field and enter a 12-digit number (010123456789). 7. Click "Register."	1. The system blocks form submission for all attempts. 2. Appropriate inline errors are displayed, indicating that the number must be exactly 11 digits and start with valid Egyptian carrier prefixes (010, 011, 012, 015).	 Fail	 HLTHCR3-102

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
HLTHCR3-51	Verify Phone Number rejects already registered numbers	Pre-conditions: 1. Connected to the internet 2. Open the register page. 3. An account with the phone number 01012345678 already exists in the system database. Steps: - Fill all mandatory fields with valid data. - Enter the existing phone number 01012345678 in the Phone Number field. - Click on the "Register."	1. The system blocks form submission 2. Displays an error message indicating that the phone number is already registered and must be unique.	 Pass	—
HLTHCR3-65	Verify Date of Birth accepts exactly 18 years of age	Pre-conditions: 1. Connected to the internet. 2. open register page Steps: 1. Fill all mandatory fields with valid data ,expecting the Date of Birth. 2. Enter a date of birth that is exactly 18 years prior to the current system date (today is Sept 8, 2026; enter 08/09/2008). 3. click on" Register."	1. The system accepts the date of birth, as the age is exactly 18 years relative to the system date, and registers the account successfully without errors.	 Pass	—
HLTHCR3-66	Verify Date of Birth rejects ages under 18 and future dates	Pre-conditions: 1. Connected to the internet. 2. open register page. Steps: 1. Fill all mandatory fields with valid data, expecting the date of Birth.	- The system blocks form submission for both attempts. - An inline error is displayed indicating that the date must be in	 Fail	 HLTHCR3-101

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
		2. Enter a Date of Birth, making the user exactly 17 years and 364 days (today is 9 Sept 2008; enter 09/09/2026). 3. Click on the "Register." 4. Observe the validation message. 5. Clear the field. 6. Enter a future date (10/10/2026). 7. Click on the "Register."	the past and the age must be 18 years relative to the system date		
HLTHCR3-67	Verify Password rejects invalid lengths (7 and 21 chars)	Pre-conditions: 1. Connected to the internet. 2. Open the register page. Steps: 1. Fill all mandatory fields with valid data, expecting Password and Confirm Password. 2. Enter a 7-character password satisfying all complexity rules (Pass@12) in both fields. 3. Click "Register" and observe the validation. 4. Clear the fields and enter a 21-character password satisfying all complexity rules (password@12345678901). 5. Click "Register."	1. The system blocks form submission and displays an inline error indicating the password must be between 8 and 20 characters.	 Pass	—
HLTHCR3-68	Verify Password rejects missing character complexity	Pre-conditions: 1. Connected to the internet. 2. Open the register page. Steps:	1. The system blocks submission for all attempts and displays an inline error	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
		1. Fill all mandatory fields with valid data, except Password and Confirm Password. 2. Enter a password missing an uppercase letter (password@123) and click "Register." 3. Clear fields and enter a password missing a lowercase letter (PASSWORD@123) and click "Register." 4. Clear fields and enter a password missing a digit (Password@abc) and click "Register." 5. Clear fields and enter a password missing a special character (Password123) and click "Register."	indicating the password must contain 1 uppercase, 1 lowercase, 1 digit, and 1 special character (!@#\$\$%^&*).		
HLTHCR3-69	Verify Confirm Password rejects mismatched inputs	Pre-conditions: 1. Connected to the internet. 2. Open the register page Steps: 1. Fill all mandatory fields with valid data. 2. Enter a valid password in the Password field (Ahmed@2026). 3. Enter a different password in the Confirm Password field (Ahmed@2027). 4. Click "Register."	1. The system blocks form submission and displays an inline error indicating the Confirm Password must match the Password field exactly.	 Pass	—
HLTHCR3-70	Verify Full Name field sanitizes	Pre-conditions: 1. Connected to the internet.	1. The system treats the input as	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
	malicious(removes harmful content) JavaScript inputs (XSS)	2. Open the register page. Steps: 1. Fill all fields with valid data. 2. In the Full Name field, enter: <script>alert('XSS')</script>. 3. Click "Register."	plain text, does not execute the script, and rejects it for containing special characters.		
HLTHCR3-71	Verify passwords are not exposed in URL or network logs	Pre-conditions: 1. Connected to the internet. 2. Open the register page Steps: 1. Open the browser's Developer Tools (F12) and navigate to the Network and Console tabs. 2. Fill the registration form with valid data (Password: Ahmed@2027). 3. Click "Register." 4. Inspect the HTTP request method and the console logs.	1. The request is sent via POST method. The password is not appended to the URL and is not printed in plain text in the console or network logs.	 Pass	—
HLTHCR3-72	Verify Email field is immune to SQL Injection payloads	Pre-conditions: 1. Connected to the internet. 2. Open the register page. Steps: 1. Fill all fields with valid data. 2. In the Email Address field, enter: ' OR 1=1 -- . 3. Click "Register."	1. The system blocks submission and displays an invalid format error. The database does not throw an SQL syntax exception.	 Pass	—
HLTHCR3-110	Verify registration page responsiveness on	Pre-conditions: 1. Open the register page	1. The user interface is fully responsive across	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
	mobile dimensions (<480px)	Steps: 1. Open the browser Developer Tools. 2. Toggle the Device Toolbar to simulate a mobile viewport. 3. Set the screen width to {{479px}} or lower to test the mobile breakpoint. 4. Inspect the layout of all input fields and text alignment. 5. Click "Register."	mobile screens. All form elements scale appropriately, text remains readable, fields do not overlap, and horizontal scrolling is entirely absent.		
HLTHCR3-111	Verify system state persistence in localStorage upon page reload	Pre-conditions: 1. Open to the registration page. 2. Clear any existing browser data for a fresh session Steps: 1. Open the browser's Developer Tools (F12) 2. Navigate to the <i>Application</i> tab (in Chrome/Edge) or <i>Storage</i> tab (in Firefox). 3. In the left sidebar, expand <i>Local Storage</i> and select the application URL ({{ahmedsayed28.github.io}}). 4. Fill the registration form with valid data and click "Register." 5. Observe the Local Storage panel to confirm a new record (e.g., user data or session token) is created. 6. Reload the webpage (press F5 or the Refresh button).	1. The client-side state is managed successfully using {{localStorage}}. The data persists reliably across the page reload, and the system retains the user's logged-in state or saved data without clearing it.	 Pass	—

Test ID	Summary	Test Steps	Expected Result	Status	Defect / Link
		7. Verify the Local Storage panel and the current UI state.			
HLTHCR3-112	Verify password is not exposed in plain text within localStorage	Pre-conditions: 1. Open the registration page. Steps: 1. Open the browser's Developer Tools (F12). 2. Navigate to the <i>Application</i> tab. 3. Expand <i>Local Storage</i> from the left sidebar and click on the application URL. 4. Fill the registration form with valid data (Use Password: {{Ahmed@2027}}). 5. Click on the "Register" button. 6. Inspect the key-value pairs generated in the Local Storage panel	1. The system should maintain state across sessions but must NOT expose the password in raw text logs. The password field should either be omitted from the storage or properly hashed/encrypted.	✖ Fail	 HLTHCR3-113
